SCTE® International Cable-Tec Games Competitors Announced

27 Competitors Set to Compete at Expo® 2023

Exton, Pa. — (September 20, 2023) — The Society of Cable Telecommunications Engineers (SCTE®), a CableLabs® subsidiary, announces this year’s competitors for the International SCTE Cable-Tec Games 2023, where the best cable technicians from around the world come to compete and showcase their skills. After months of competition among SCTE chapters across the United States and Canada, 27 of the most skilled field workers will step onto the show floor inside the Colorado Convention Center and the Games will commence at 9:00 AM MDT on Thursday, October 19, at Cable-Tec Expo® 2023.

Representing their SCTE chapter, the competitors slated to compete in the International Cable-Tec Games at the 40th anniversary Expo will be: Sean Wingblade, Golden Gate chapter; Donnovan Sorenson, Rocky Mountain chapter; Dosty Hedges and Timothy Palmer, Cactus chapter; Noah Collins, Snake River chapter; Ryan Moss and Tom Hawk, Mt. Rainier chapter; Aaron Cox, Hill Country chapter; Aj Campos, Sooner State chapter; Bryan Huffstutler, Gateway chapter; Stephen Rangel, Iowa Heartland chapter; Rich Beversdorf, Badger State chapter; Nathan Krick, North Country chapter; Lamont Williams, Great Lakes chapter; Ian Burnett, Central Indiana chapter; Jeff Adkins, Music City chapter; Shannon Cameron, Razorback chapter; Charlie Boivin, Chattahoochee chapter; Christopher Woehrle, Central Florida chapter; Patrick Powers, Crystal Coast chapter; Jim Egloff, Bluegrass chapter; Paul Perrotta and Jim Tulley, Penn-Ohio chapter; Eric Tracy, New England chapter; William Phillips, New York City chapter; and Matt Berti and Jesse Hofland, representing the Ontario chapter.

Comcast has the most workers qualified for the Games this year with nine competitors, followed by Charter with five, Cox with three, and Armstrong and Cogeco Cable which each have two. The workforces of Madison Communications, Mediacom, Optimum, Ritter Communications, Sparklight, and Vyve Broadband will also be represented with a competitor in the Games.

This year’s winners from local cable games, typically held at chapter vendor shows or regional cable shows, will vie for the international gold, silver, and bronze awards in seven categories: cable splicing, meter reading, cable jeopardy, OTDR, fiber splicing, drop connection and MTDR.

The International Cable-Tec Games will take place in a new venue at Expo 2023; the Technical Training Theater will make its debut on the show floor. T³ is not only the abbreviation for this special space, but it also stands for the three pillars of technical excellence — training, teamwork, and talent — and how this combination creates exponential results. T³ is where the technical workforce will hone their skills and knowledge to become champions in their respective fields. Attendees and exhibitors alike are encouraged to experience the thrill of the International Cable-Tec Games as T³ makes its debut as the place to train, compete, and excel.
“The rapid pace of technological advancements in the industry makes it essential that our technical workforce is prepared,” says Mark Dzuban, SCTE CEO. “That’s why we’ve added the Technical Training Theater this year, to continue to drive workforce development.”

The Games have been an annual Expo tradition since 1991. The medallions awarded in the Games are symbolic of the training that creates winners in the workplace. As is tradition, SCTE Chapters and Meeting Groups host Cable-Tec Games at all levels of the organization. Over 500 local, state and regional competitors participate to determine who will represent the chapter or region at the International Cable-Tec Games at Expo.

Known globally as the preeminent venue for thought leadership, engineering innovation, and pioneering business insights, the 40th SCTE Cable-Tec Expo will reunite thousands of professionals for more than 100 hours of learning with premier thought leaders and hundreds of innovative vendors with leading-edge technology solutions, October 16-19, 2023, in Denver, Colorado. Exhibitor and sponsorship opportunities are still available at https://expo.scte.org/exhibit-in-2023/.

About SCTE® Cable-Tec Expo®

Celebrating 40 years of bringing industry professionals together to connect, collaborate and innovate, SCTE® Cable-Tec Expo® is the preeminent venue for thought leadership, engineering innovation and dealmaking within the broadband telecommunications industry. The Society of Cable Telecommunications Engineers (SCTE), a subsidiary of CableLabs®, will be hosting Expo 2023 in Denver, Colorado, October 16-19. Chaired by Chris Winfrey, president and CEO of Charter Communications, and Tony Staffieri, CEO of Rogers Communications, "EXPOnential" will assemble industry leaders from around the globe and showcase the most compelling technologies that are building the future of cable telecommunications. More information at expo.scte.org.

About SCTE®, a subsidiary of CableLabs®

SCTE is shaping the future of connectivity. Through technological leadership and innovation, SCTE has served as the applied science leader for the cable telecommunications industry for more than five decades. As a not-for-profit member organization, SCTE moves member companies forward through continuous training for the workforce of tomorrow and by putting leaders into the conversations that matter. SCTE is the force behind the annual SCTE Cable-Tec Expo, the largest cable telecommunications and technology tradeshow in the Americas. Learn more at www.scte.org.
